

TOWN OF PRESCOTT

NOTICE

New changes to our Garbage Collection Program

In 2009 Council directed staff to discontinue the sale and use of paper garbage bags. The supply of paper bags will be depleted in late September or early October and from then on plastic bags will be the choice for disposal of your garbage.

The Public Works Department as directed by Council is currently in the process of completing a Waste Management Study that will be presented to Council for comments and direction in October 2011. Public comments will be accepted at this meeting or on the Town of Prescott web site for a period of ten days following the presentation. Upon completion of this time period staff will review comments from the Public and present final recommendations to Council on the Waste Management Strategy for the Town of Prescott.
